

# **Workshop Format**

**GETTSIM Workshop 2026 · Bonn**

# The Next Two Days

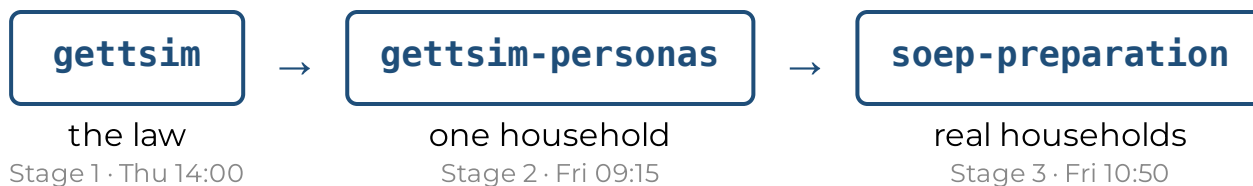

You work **in a group**, on **one policy reform you care about**.

The reform is taken once around the ecosystem:

- **Thursday afternoon** — find it in the law, then change the law
- **Friday morning** — see what it does to a household
- **Friday late morning** — see what how it interacts with data from the SOEP

On Friday we are interested in your experiences: What worked well, what didn't?  
What do you need to make it work better?

# The Round Trip

We will give you example code for each stage. Feel free to use it, or not.

# One Reform, Three Stages

**Stage 1.** Find your topic in GETTSIM's implementation of current law. Make sure the current status quo looks right. Then implement the reform via a custom policy environment.

**Stage 2.** Put your reform on a (range of) **Musterhaushalte** and vary a dimension — earnings, rent, pension income. How does your reform change household's budget constraint?

**Stage 3.** Take the same reform to SOEP. Who gains, who loses, what does it cost?

# If You Have No Topic

Some suggestions:

**Grundsicherung im Alter after the Alterssicherungskommission** Freibetrag on statutory pensions for everyone.

**A capital pension and the Nettoersatzrate** How does the planned gesetzliche Kapitalrente affect the net replacement rates of poor and rich retirees?

**Familiensplitting instead of Ehegattensplitting** Pick your favorite implementation and see how it affects income taxes.

# Matchmaking

**Requirement:** At least one person with a GETTSIM installation and SOEP access

**Group Formation:** Tell the audience what you want to work on, then people can self-select

# Use all the help you can get

Just a few months ago, this roundtrip would have taken days for newbies.

Use all the help you can get:

- Your group members
- Your favorite AI
- The GETTSIM documentation
- The example notebook
- Hans-Martin and me

It's finish that you finish somewhat on time so that we can continue. Don't overengineer.

# Raise Your Hand

Which reform do you want to work on?
